## Extinction of Silence

Silence isn't the absence  
of something, but the  
presence of everything

## We need natural silence

"I often tell people that bringing quiet into your life is both physical and metaphorical. Find quiet time every day, even if it's just a few minutes. It could be as simple as sitting on a bench in your local park or looking out your window in silence for a few moments. These activities actually make us healthier and more productive people!"
